

Delivering green infrastructure in economic growth areas: the key role of sub regional partnerships.

A half day seminar event on the 2nd March 9am – 1pm at the City Hall GLA

The Wandle Valley Regional Park Trust invites you to a half day seminar to discuss how sub-regional partnerships are a viable means to fund, deliver and manage green infrastructure in economic growth areas.

The seminar will demonstrate how partnerships between public, private and third sectors can deliver green infrastructure to benefit economic development, growth, transport, Placemaking, and wellbeing.

It should be of interest to developers and housebuilders, registered social landlords, business improvement districts, Placemaking professionals, Local Authority leaders and the third sector.

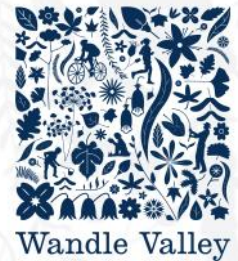

The seminar at City Hall is sponsored by Lee Valley Regional Park Authority and supported by the GLA. It features speakers from the private, public and voluntary sectors who will demonstrate the value of sub regional partnerships and their importance to deliver green spaces in economic growth areas.

The seminar will be chaired by Peter Murray the Chair of New London Architecture, who will facilitate panel discussions and Q and A sessions from a diverse audience.

Delivering green infrastructure in economic growth areas: the key role of sub regional partnerships.
