

RIVER REHAB

River Rehab is your chance to make a difference to your local river!

You will be part of a team of volunteers working to design and deliver a river restoration project this September.

There will be plenty of training opportunities for you from river design to Microsoft Office, from wetland habitat creation to Urban River surveys.

You will gain valuable fieldwork experience on sites along the Wandle and Hogsmill Rivers to practice your training and further develop your skills.

You will take part in site assessments, pre-restoration surveys and post-restoration monitoring; demonstrating the positive effect your project has had on the environment.

As a team and using the knowledge gained from your training, you will design a new stretch of river to enhance its ecological potential.

And perhaps most importantly, you will deliver your project on the Wandle, seeing all your hard work pay off.

Please consider your availability when signing up to this project and the tasks involved.

We understand you are kindly donating your time to us however this project requires a certain level of dedication if we are to be successful in our aim of a volunteer-led restoration project.
